CPSI is a leading educational software development and implementation company providing robust automated solutions for Active Directory Management, SIF Integration, Data Consolidation, Data Validation, Data Warehousing and Reporting. CPSI brings over 20 years of experience in applying our data integration technologies within educational organizations with thousands of users and large data sets. Our mission is to develop and implement solutions that are highly extensible, well tested, dynamic, flexible and provide many years of service. CPSI and Edupoint partnered in 2006 and produced the Synergy SIF Publishing Agent to assist districts in sharing data across applications.

## Here are some frequently asked questions about our ZIS:

### Okay, so how do I get the ZIS?

Just visit [cpsiltd.com](http://cpsiltd.com) and fill out an application or contact our sales team at [sales@cpsiltd.com](mailto:sales@cpsiltd.com).

### Who can take advantage of this offer?

Nearly all school districts, school boards, charter schools, and private schools are eligible. Statewide and regional offices are not eligible. Please visit our web site to find out more.

### Is support free too?

No. Support and installation services are offered at an additional, but very reasonable cost. You may purchase either a year of full red carpet support or support by the incident as you need.

### What about training?

We offer training services over the web with Microsoft LiveMeeting for \$500. This covers training on installation, agent registration and basic troubleshooting. This does not include actually setting up your ZIS at your site.

### Will I need a key file or license key?

Yes. The key file for district and schools under 15,000 students expires in two years. Larger districts receive a one year key file. Renewal is as simple as a quick e-mail to us for a new key.

### What are the hardware requirements?

For installations up to 15,000 students, the recommended hardware/software is:

- Double Intel Xeon or equivalent processor
- 4 GB RAM
- 400 GB Free HD Space, RAID 5
- Windows Server 2003 Advanced
- Microsoft SQL Server 2005 Standard
- Microsoft IIS 5 or higher
- Microsoft .NET Framework 3.5

### Can I host the ZIS with this license?

No. Please contact our sales team for hosting facility licensing.

### Will this license cover upgrades?

Of course. We release new versions of the ZIS as the SIF spec changes. When you are ready to upgrade, just contact us for the latest version.

### How much does it cost for CPSI to install the ZIS for me?

We charge a flat rate of \$500 for installation. This includes installing the software, agent registration in the appropriate zone, and ACL setup for two SIF agents. You must provide us with remote access to your server via VPN or RDP.

### Is your ZIS open source?

No. You will receive our SIF-Certified ZIS product that was previously offered on a paid commercial basis.

**CPSI** is a company that believes in education. We believe that you should be spending your time doing the things that count, not fussing with the technical aspects of data management and SIF Integration. We believe in education so much, that we are offering our SIF Zone  Integration Server for free. Yes, it really is free. This is our gift to the educational world, no strings attached. Visit our web site to sign up today.
